TAYLORTRAK[®]

REMOTE MONITORING SYSTEM

Monitor and track your machines
Whenever! Wherever!

Monitor and track your machines... **Anytime... Anywhere!***

Fleet equipment is an integral part of your business. Protect it!

The most important thing that a business owner can do is to make sure the equipment owned is running properly. Machine downtime doesn't make any money. It makes sense to ensure that you are getting the most out of your investment.

With "TaylorTrak," you have the information available at your fingertips to help keep things running.

Maintenance is key to ensuring performance.

Proper monitoring and data collection is integral in maintaining your machine, additionally, regular maintenance checks are necessary to ensure your machine operates properly. Regular maintenance of your machine can decrease your downtime and increase your productivity. "TaylorTrak" gives you the ability to keep track of daily usage and operating data such as operating hours, fuel usage, and service interval settings **WIRELESSLY...** and that's just the beginning!

How it works...

Using the proven TICS system (Taylor Integrated Control System) in conjunction with the GSM (Global System for Mobile) and GPS (Global Positioning System) networks, you can now have time-stamped data and location of individual machines within your entire fleet. Your machine is fitted with the "TaylorTrak" system, integrated GPS receiver and antenna. All you need is a computer with internet connection. After that, you can begin collecting the data you need. All you have to do is login to your own secure area and your data is waiting for you. You can follow where your machine has been with the GPS tracking feature. Knowing how your machines do their job is a key factor in your productivity. All this... Wirelessly.

*Service requires machine to be located in GSM cellular coverage area.

*Data dependant on machine model.

Wireless data at your finger tips!

What are the benefits and features?

On-demand daily operating

- Data is regularly updated from each machine, while in use, to your secure area. This includes:
 - Total fuel usage
 - Average fuel rate
 - Engine operating hours
 - Engine fault codes
 - Machine location (time stamp tracking)
 - Lift counter (when applicable)
 - Service interval
 - Seatbelt status
 - Pick Counter (top, side and WTP)
 - Forward alarm status
 - Shift mode
 - And much more...
- Downloadable reports for print or email
 - Formats available: PDF, Microsoft Excell, Microsoft Word or CSV
- Easy to understand format
- Up to 13 months of data stored at all times
- Custom alerts sent directly to your email or cell phone
- GPS mapping feature allows you to track your vehicle location via maps and satellite images

**We want to help you
protect your investment.**

Staying in touch

No matter where you are - on the road, in the airport, or even at the beach - you can stay in touch with your business in a way you never thought possible.

"TaylorTrak" is a fleet management system allowing you to track and monitor your entire fleet or an individual machine from any computer with internet access from anywhere in the world.*

Let "TaylorTrak" supply you the information you need to stay ahead.
